

Kentucky Lepidopterist

Newsletter of the Society of Kentucky Lepidopterists

Volume 44 Number 1 16 March 2018

JAMES ADAMS: PRESIDENT

In 2016, I was president of the SKL, and had intended to fulfill that post for the 2017 year as well, but personal issues made it necessary that I back out. Gerald Burnett, from whom I “inherited” the position, graciously agreed to step back in for 2017. At the November 2017 meeting, I was “re-elected” and so am happy to again serve as your President.

I provided a lengthy story of my life with Lepidoptera for the News back in 2016, and so will not repeat that here. I will, however, suggest that if you have an interest in pursuing leps outside of the state of Kentucky, that you come south to visit NW Georgia at some point so I can show you some of the good moth collecting localities. If you want to explore GA more than that, then you should also feel free to contact me for suggestions, and, if we plan in advance, I would be more than happy to take you to different places in the state.

I have provided a rather current image of myself, and a couple of pictures of some nice leps from Georgia. Enjoy!! (Page #10)

SPRING FIELD MEETING 2018

The spring field meeting of the Society of Kentucky Lepidopterists will be held over the weekend of 13-15 April 2018. We'll be traveling to Whitley City in McCreary County, KY. We have a small block of rooms set aside for our group at the Red Roof Inn there. The address is 1116 U.S. Rt. 27, Whitley City, KY 42653. Rates are \$55.00 for a king room or \$60.00 for a double room with two queen-sized beds. To reserve one of these rooms call Red Roof Inn at 606-376-3780 and mention the Society of Kentucky Lepidopterists or Loran Gibson.

Other accommodations in the area include Parkland Motel, 1950 S Highway 27, Stearns, KY, 42647, phone 606-376-5046. Big South Fork Motor Lodge, 136 Bruce Street, Stearns, KY, 42647 phone 606-376-3156. We've stayed at the Parkland Inn in the past (many years ago), but I know little about the latter.

There are not a lot of restaurants in the area to choose from. There are a few fast food outlets locally including McDonalds. There is also a Mexican Restaurant and a local Dairy Bar. The Dairy Bar has a varied menu, and we can recommend it, especially the ice-cream.

A much greater variety of motels and restaurants are located in Somerset, KY in Pulaski County which is about 30 miles north of Whitley City via U.S. Rt. 27.

THE SOCIETY OF KENTUCKY

LEPIDOPTERISTS is open to anyone with an interest in the Lepidoptera of the State of Kentucky. Membership dues are annual: \$15.00. Dues sent to the Treasurer: Les Ferge, 7119 Hubbard Ave. Middleton, WI 53562
E-mail: lesferge@gmail.com

We chose Whitley City for the spring field meeting because it is central to a number of good natural areas in Daniel Boone National Forest. Southwest of Whitley City are the Big South Fork of the Cumberland River, Rock Creek, and White Oak Creek. County Road 1363 leads south from the west side of the bridge where KY Rt. 92 crosses the Big South Fork of the Cumberland River. Route 1363 follows White Oak Creek and Rock Creek to the south where we have done well collecting before. Much of this road is within the National Forest, but there are also many private properties along this route. There are a couple of recreation areas here including Hemlock Grove and Great Meadow. If you want to primitive camp, check out these areas. Blue Heron Camping Area in Big South Fork National River and Recreation Area is a nice, full service camping area with water and electricity and bath houses. I recommend this one if you have a camper or if you just want to tent-camp. Collecting is not permitted in the Big South Fork Recreation area. It is part of the National Park Service.

North of Whitley City are several additional locations of interest including Beaver Creek Wilderness, Beaver Creek WMA and The Great Gulf. With its deep gorges and a large, beautiful natural arch, The Great Gulf is very similar to Red River Gorge. West of The Great Gulf is where I collected the "rare spring moth", Heliomata infulata on 14 April 2011, so hopefully we can locate that one again. Hesperia metea is fairly common in this area most years as well as the "elfins" and many other spring butterflies. Moth diversity should be good throughout the National Forest with several types of forest communities to sample. For example, set traps in pine groves for a variety of pine feeding Zale species as well as several tortricids and geometrids, and many other moths.

Try hemlock groves for Feralia comstocki. Weather will no doubt dictate our success, so hope for a "normal" spring. We had planned to visit McCreary County on the weekend of 21 April last year, but the area received four inches of rain then and we cancelled the meeting!

Be careful where you set your light traps as wild turkey hunting season begins in Kentucky on the morning of 14 April. It might be a good idea to wear orange on Saturday if you have it.

A map of this area can be found on Page#85 of the Kentucky Atlas and Gazetteer.

Specifics of meeting locations and times have not yet been set, so if you have preferences, get in touch with Loran and let him know you are planning to attend.

Loran's contact information:

**SOCIETY OF KENTUCKY
LEPIDOPTERISTS
BOARD MEETING MINUTES 2017
BY
TONY MERKLE: SECRETARY**

The meeting was brought to order by President Gerald Burnett. Others in attendance were: James Adams, Society Member; Les Ferge, Treasurer; Loran Gibson, Field Trip Coordinator; Richard Henderson, Member At-Large; Leroy Koehn Newsletter Editor; Ellis Laudermilk, Member At-Large; Raymond Little, Society Member; Tony Merkle, Secretary; Don Tangren, Member At-Large.

The first item discussed was the treasurer's report. Treasurer Les Ferge distributed a copy of the most recently compiled annual cash flow statement for the organization to each person in attendance. He indicated that the organization had operated at a deficit of \$69.70 for the year but that it still had a balance of \$5,629.62 in the bank. The organization membership total of eighty two (82) was also given and reported as being down from eighty seven(87)a year ago. A brief discussion regarding the possibility of sponsoring members, particularly students, in order to help boost membership, took place. It was suggested that if pursued, a notice regarding aspects related to it (i.e. how it could be done) could possibly be included in the newsletter. No formal action was taken regarding the issue. A motion was made to accept the treasurer's report as presented. The motion was seconded and passed without objection.

The second item discussed was the organization's website and online database. A discussion took place regarding ongoing issues with the database and the need to have them rectified. A suggestion was made to have the database examined by individuals who could determine what the problems are and suggest or implement appropriate solutions. A motion was made to have newsletter editor Leroy Koehn contact and work with individuals who could do this to accomplish the needed changes. The motion was seconded and passed without further discussion or any objections.

The third item discussed was organization decals or stickers. It was mentioned that the cost was found to be excessively expensive due to the fact that they had to be purchased essentially in bulk amounts. After a brief discussion of the matter, Leroy Koehn agreed to look into the situation regarding them once again.

The fourth item discussed was the preservation and safety of the state collection. Aspects related to its long term protection were discussed. No formal actions were taken regarding this.

The fifth item discussed was measures that could be taken for honoring the recently deceased, long-time society member Bill Black. It was mentioned that a moment of silence was planned for him at the beginning of the business meeting. A suggestion was also made to establish an award named for him. Various options for doing this were discussed. Ultimately, a proposal was made for an award named the William R. Black Jr. Award to be established and given when deemed appropriate to a deserving lepidopterist and/or society member at a cost not to exceed \$100.00. A motion was made to establish such an award. The motion was seconded and passed without objection. A separate proposal was forwarded based upon an invitation that had been given for our organization to participate in a "Pollinator Weekend", on the weekend of June 29 through July 1, 2018, also to be dedicated to Bill and held at one of the state parks in western Kentucky. It was suggested that one of our society's field trips could be scheduled to correspond with the event aimed at fostering interactions that would demonstrate interesting aspects of lepidopteran studies thereby serving as a potentially useful outreach tool for the organization. Various questions and concerns related to participating in the event were discussed. Field Trip Coordinator Loran Gibson indicated that he would look into the possibility of scheduling it as one of the field trips for the year.

The topic of discussion then turned again to the organization's website. Particular concerns related to its control and how it relates to the overall design and updating independent organizational website started were mentioned. A motion was made to pursue the Society's web-site that would be operated in-house by our society. The motion was seconded and passed without opposition. Further discussion about who might serve as webmaster took place. Attending member Raymond Little agreed to do so provided he receive necessary assistance from other members who could lend support.

The sixth item discussed was organization officers for the upcoming year. Gerald Burnett indicated he would be stepping down as president and James Adams indicated he would be willing to assume the position again. All of the other officers agreed to continue serving in their current capacities for another year.

The last item discussed was the annual butterfly count field trip held in Oldham County near the 4th of July holiday. It was expressed that Dr. Charles Covell had indicated that he would no longer be conducting it. The discussion centered on whether or not the event should be continued in Charlie’s absence and if so who would be willing to take responsibility for conducting it. The matter was left unresolved pending further discussion and/or consideration by those interested or otherwise involved with it.

Finally, a motion was made to adjourn the meeting. The motion was seconded and passed without opposition and the meeting ended.

**Society of Kentucky Lepidopterists
Business Meeting Minutes 2017
By
Tony Merkle**

The meeting was brought to order by President Gerald Burnett. The first order of business was the treasurer’s report. Society Treasurer Les Ferge indicated that, during the course of the previous year, expenses had exceeded income by \$69.70 but that the organization still had \$5,629.62 in the bank. The reason for the deficit was attributed in part to a continued decline in membership. The membership total was reported to be eighty two (82) reflecting a decline of five from the previous year. He further indicated that dues notices would be sent out in December or January to those who had not yet paid them. Also reported were contributions in the amount of \$300.00 made in memory of Bill Black. After the report was given, a motion was made to accept it. The motion was seconded and passed without objection.

The second order of business was membership concerns and suggestions. Proposals for possibly sponsoring youth and/or students having an interest in lepidopterology were presented. It was mentioned that an announcement would be posted in the newsletter aimed at encouraging individuals to consider doing so and instructing them about how they could. Other avenues for promoting the organization such as through biology departments of universities in the state, through the organization’s FaceBook page and through an advertisement on the Moth Photographers Group website, (<http://mothphotographersgroup.msstate.edu>), were also discussed.

The third order of business was website and database concerns. It was stated that the organization would move toward having its own website free of external controls. It was also mentioned that Raymond Little had agreed to assume the position of webmaster with the aid of others in the organization.

The fourth order of business was organization decals and/or stickers. A brief discussion took place regarding these. Leroy Koehn agreed to check into possibilities on them again.

The fifth order of business was recognition measures that could be dedicated to recently deceased society member Bill Black. Three such measures were proposed. The first was for lifetime membership awards that are given by the organization to be done so in his name. The second was for youth sponsorships or scholarships to be given in his name. The third was for a recognition award to be established in an amount not to exceed \$100.00 to be given to an individual deemed deserving of the recognition for their contributions to the society. A discussion about the third proposal took place regarding how it might be done and the impact(s) it might have given its similarity to the Cornett Award that the organization already awards. A suggestion for possibly renaming the award so as to honor both individuals was given. James Adams agreed to contact Dr. Charles Covell to get his opinion about establishing a new award called the Cornett/Black Award. A motion was made to create the award if Charlie agreed to it. The motion was seconded and passed without opposition.

The sixth order of business was consideration for participating in a “Pollinator Weekend” at one of the state parks in western Kentucky during the weekend of June 29 through July 1, 2018. It was mentioned that an invitation had been extended to our organization to do this which would present an opportunity for doing interesting and educational demonstrations. The setting-up of a light sheet was mentioned in particular as an appropriate and desirable activity. The possibility for making participation a part of one of our organization’s field trips was mentioned particularly if collecting permits could be obtained. Gerald Burnett indicated he would look into the situation further to determine its overall feasibility and Loran Gibson indicated he would include it in the field trip schedule if appropriate. It was decided that other field trip dates and places would remain open at this time.

The final order of business was officers serving in the coming year. It was mentioned that all those currently serving had agreed to continue in their same capacities for the coming year except for Gerald Burnett who would be stepping down as president. James Adams agreed to assume the position of president again. The proposed slate of officers for the coming year thus became:

- James Adams, President
- Les Ferge, Treasurer
- Leroy Koehn, Newsletter Editor
- Loran Gibson, Field Trip Coordinator
- Tony Merkle, Secretary
- Richard Henderson, Member-at-Large
- Don Tangren, Member-at-Large
- Ellis Lauder milk, Member-at-Large

A call for other nominations was given. None were presented. A motion was made to accept the slate as presented. The motion was seconded and passed without opposition.

After another brief discussion about the organization’s database relating to its operational status/availability, its functionality and the legitimacy of its data, a motion was made to adjourn the meeting. The motion was seconded and passed without opposition and the meeting adjourned.

40th ANNUAL BUTTERFLY COUNT

The 40th annual "July 4 Butterfly Count" will be held in the usual place on Saturday June 30, 2018. We will meet at the "Sugarbabe's" antique store parking lot at Brownsboro, 1 mile off I-71 in Oldham Co., KY, at 9:30 AM. After briefing we will go to the fields and woodlands of the former Bob Horner farm and Horner Bird and Wildlife Sanctuary. We will count butterfly numbers and species until noon in the fields, then move on to the more wooded sits. Dan Rechter, whose company Rogers Group now owns the property, will assist us. We will end the count at 3 PM. In case of rain we will try again at the same time on Sunday July 1, 2018.

I hope to see you there. It would be good to hear from you if you can attend.

Dr. Charles V. Covell.

2017 ANNUAL MEETING

It was a great meeting with 24 members attending. There were several excellent presentation. We also learned that Dr. Mike Sharkey has retired. We will have a new contact for the 2018 meeting. Dr. Sharkey has been our host and provides access to the University of Kentucky for our meeting. We returned to the B.F.

Annual Meeting Attendees.

After Meeting Dinner at Applebees.

Goodbarn this year for the Friday night gathering of Lepidopterists.

Enjoying food, drink and conversation.

SOCIETY OF KENTUCKY LEPIDOPTERISTS

Statement of Cash Flow for the Period 11 November 2016 thru 17 November 2017

Balance on 11 November 2016	Checking Account	\$5,682.38
	Petty Cash	<u>\$16.94</u>
	TOTAL	\$5,699.32

Cash Receipts

Dues and contributions deposited in checking acct.	\$1,307.00
Dues and contributions deposited in petty cash	<u>\$32.00</u>
TOTAL	\$1,339.00

Cash Disbursements

Dues Billing	\$0.00
Misc. postage/office supplies	0.49
2016 meeting & keynote speaker expenses	\$520.56
Newsletter Vol. 42 No. 4 (4/3/2017)	\$344.15
Newsletter Vol. 43 No. 1 (10/30/2017)	<u>\$543.50</u>
TOTAL	\$1,408.70

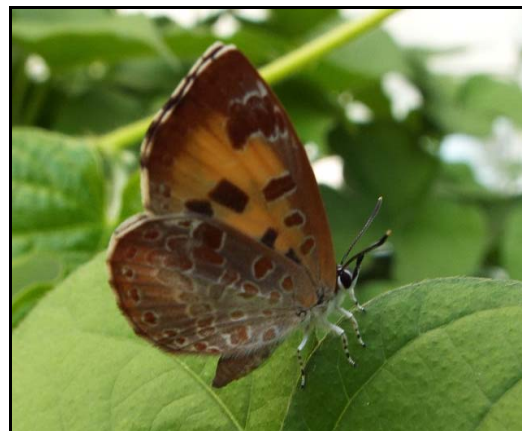

Balance on 17 November 2017	Checking Account	\$5,613.17
	Petty Cash	<u>\$16.45</u>
	TOTAL	\$5,629.62

Net increase (decrease) (\$69.70)

2017 SUMMARY: Society membership stands at 82 (77 paid), a loss of 5 from 2016.
 Nine members are not paid for 2016
 29 members have elected to receive the electronic newsletter.
 Expenses exceeded Income by \$69.70
 Bill Black Memorial contributions were \$300.00
 Members owing 2018 dues will be billed in January.

**TWO NEW *RHYACIONIA* FOR KENTUCKY
BY
RAYMOND N. LITTLE AND JOANNE RUSSO**

In Kentucky, the following Pine Tip Moths of the genus *Rhyacionia* are known from the state: *R. akitta*, *R. buoliania*, *R. busckana*, *R. frustrana*, and *R. rigidana*.

On February 20-21, 2018 four very similar looking male *Rhyacionia* were collected at a light in McCreary County, Kentucky. Upon closer examination, three of them appeared to have different lengths of sensilli on the antennae (Fig.2). After the specimens were spread and photographed, the abdomens were sent to JoAnne Russo for dissection. Based on the dissections and antennae, it was determined that the 4 moths represented 3 species *R. adana*, *R. busckana*, and *R. granti*(Fig. 1). The aedeagus in *R. adana* separates it from both *R. busckana* and *R. granti*. Although the genitalia are similar in *R. busckana* and *R. granti* (Fig. 3), the shape of the uncus is diagnostic, (Miller, 1985) the uncus in *R. busckana* is subequal in length and width and in *R. granti* the uncus' length at least two-fold mid-width). The sensilli of the *R. granti* were approximately twice the length as *R. busckana* (Fig. 2), which is consistent with Miller, 1985.

Special thanks to Hugh McGuinness, Michael Sabourin, Eric M. Metzler, Loran Gibson, and Richard Lee Brown for their assistance in the addition of *R. adana* and *R. granti* to the list of known lepidoptera in Kentucky. Genitalia photos were taken by JoAnne Russo.

BILL BLACK A REMEMBRANCE

Bill Black has been gone a year. It is hard for your Editor as well as all of his friends to realize that it has been a year. However, your Editor included all of the Tributes, Notes and Memories of Bill Black. And there were almost a dozen. But, I forgot one from Eric Quenter. I have included it in this Newsletter and it appears below. I humbly apologize for my oversight.

**IN REMEMBRANCE OF
BILL BLACK
BY
ERIC QUINTER**

October 22, 1980 was a very memorable day in my life. It was the day I met Bill Black for the first time. I was on my way back to New York City, following a two-week collecting trip targeting *Papaipema*, which had begun in North Carolina and took me to Georgia, Mississippi, and Louisiana. Heading north to Kentucky, I decided to give it one more try by tracking down Bill, hoping to find out exactly where he had collected the second known specimen of *Papaipema* new species #5 several years previously. (The first specimen ever taken had been collected by Bryant Mather on October 11, 1972 in Warren County, Mississippi.)

I arrived about mid-afternoon at the Black residence, then located on or nearby Bill's father's farm, as I recall. I was greeted by Nancy, chatted with her for a while and explained my project to her, and even set up a light trap on their front lawn (of all places!) in one final, vain attempt to catch something on my very last collecting day of that trip. When Bill arrived home after his work that day, the first thing he did after greeting me and shaking my hand was pour me a glass of fine Kentucky bourbon, welcoming me to his state. That spirit of warm hospitality and gracious enthusiasm pervaded every subsequent occasion on which we corresponded, talked on the phone, and met over the ensuing years – upon his visit to me at the American Museum of Natural History in New York City, on my subsequent field trips and visits to Kentucky, and finally on Nancy's and his delightful visit with Jane and me at our present home in Connecticut several years ago. That was to be the last time we ever saw Bill, and we are both very deeply saddened.

Over those past 36 years, Bill took it upon himself to document in meticulous detail all the actual and potential collecting sites in western Kentucky and nearby parts of surrounding states where new species #5 might occur, in and around numerous isolated canebrakes scattered along streams and tributaries, ultimately collecting many additional specimens in the process. Aside from donating enormous amounts of his time and significant effort investigating each of these individual sites over the years, he graciously donated the bulk of the specimens he collected to the project, together with numerous topographic maps, to which he obviously greatly enjoyed adding highly detailed notes and documentation.

I have had a manuscript name reserved for new species #5 for several decades, which I purposely kept mostly to myself for fear that someone might use it in some published form or newsletter, and thus inadvertently render the name permanently invalid.

I have other such manuscript names for at least five additional new species of *Papaipema* which I've always been worried that someone might use, prior to their formal. Thus I have always strongly recommended that people simply use numbers, rather than names, when referring to these species in print. So far that has worked well and there have been no transgressions.

Nonetheless, a few of these details have leaked out in the past, and *Papaipema* new species #5 has been on occasion harmlessly referred to as "the Big Y" (in reference to the name I had originally intended to give it), "The Holy Grail" and, jokingly, *Papaipema* "*humongosa*"!

Several years ago, I decided that it was much less appropriate for me to name new species #5 in honor of a long-departed friend of mine who was completely unknown in Lepidoptera circles, and instead name it to honor Bill and Nancy, and for Bill's enormous contributions toward understanding this impressively large, rare moth.

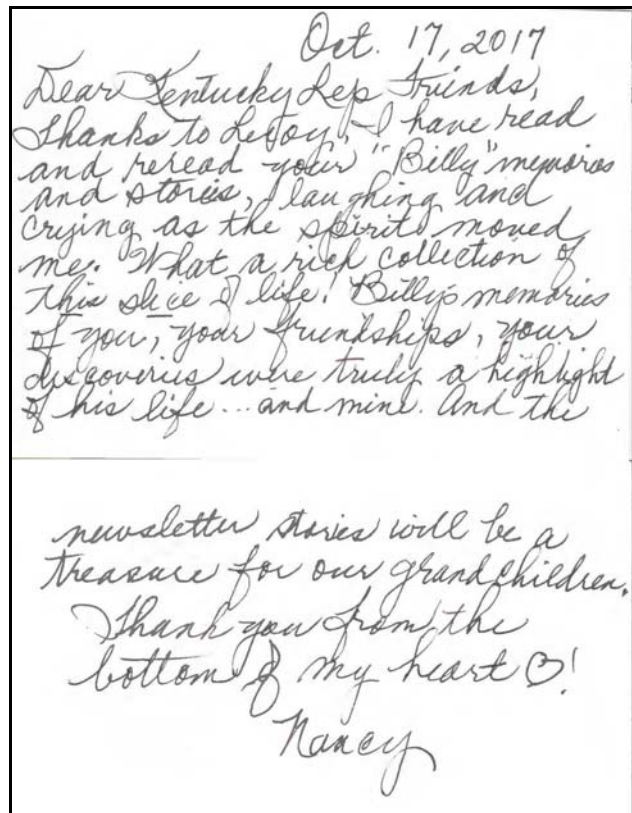

This decision has been a very closely guarded "secret" which Tony McBride, Jim Wiker and I have shared, and we were very much looking forward to the day our MONA Fascicle finally would appear, and we could surprise Bill. We were certain he would be delighted. Sadly, this is not to be and he will never know, but the honor and that promise will be kept. (A similar honor will be bestowed upon our dearly loved and late friend, Mo Nielsen.) As for the rest of you, cherish your memories of Bill, please stay healthy—and keep on mothing!

Eric Quinter

EDITOR'S NOTE

I have received a number of request to have memories or story's of Bill Black for the News. I will be more than delighted to include any story or memory of Bill Black in the next issue of the Newsletter. You can include photographs or any other items of interest.

Your Editor received a Thank You note from Nancy Black. The card is to all the members of the Society of Kentucky Lepidopterist.

EDITOR'S NOTE CONTINUED

Your Editor has not been able to produce Newsletter over the past year due to some serious health issues with my wife, Ms Betty. The decline has been stabilized and Ms Betty has recovered. Thank you to all who sent cards and emails. Ms Betty and I appreciate your prayers and concerns.

In the Fall of 2016, I agreed to conduct a Moth Survey for the Indiana Forest Alliance in 2017 of Morgan Monroe State Forest in Monroe County and the Yellowwood State Forest in Brown County. The two forest are joined at the Monroe and Brown County lines. Once a week I set out between 4 and 8 Light Traps, several dozen Pheromone Traps for Sessid moths (Which remained in place from early May to mid-September) and numerous Bait Traps. I also used Kill Type Bait Traps during the winter and hey are currently still in place. I had some help from Dennis Currutt and even my wife accompanied me several times. I will have some articles for the next several issues of the News.

**SOCIETY NEWS
AND
UP COMING EVENTS**

The Society has a Face Book page. It has news and items of interest for all of the members. Raymond Little is managing the Face Book page. We would love to hear from you! Follow us on Face Book.

The Society is also beginning to develop a new Website. We are in the early stages of the process, however, should all go well we may have a “New” Website later this year.

Your Editor needs some help. Articles of any type on Lepidoptera or Lepidopterists, especially of Kentucky are welcome. Where have you been and what have you found?

Photographs are also welcome. We have some great photographers as members of the Society. As of this newsletter, I have absolutely no photographs to share with the membership. Send your photographs to the Editor. Comments and stories regarding photographs are always welcome.

Below is a photographs that has an interesting story. Your Editor took the photograph of these two Box Tortoises at his Light Trap. And no, I am not into collecting Tortoises.

Send your articles, photographs or what ever you have that would be of interest to the membership.

**SOME VARIANCE IN LIMENITIS
ARTHEMIS ASTYANAX FROM
KENTUCKY IN 2017
BY
LEROY C. KOEHN**

During the late summer and early fall of 2017 I collected several oddly marked specimens of Limenitis arthemis astyanax. I collected these in Bait Traps that I had set out in April and did not take them down until early December. Of the hundreds of Limenitis arthemis astyanax, that I collected in all twelve (12) Bait Traps I set out, these striking variation were only found in two traps some Ten (10) miles apart.

Scott County, Great Crossing at North Elkhorn Creek.
18 August 2017

Scott County, Graig's Mill Rd. at South Elkhorn Creek.
9 September 2017.

The two specimens above were baited with Apples and Nectarines. Both were collected in Flat Bottom Type Bait Traps. The creeks are natural fly ways. I have observed hundreds of Limenitis arthemis astyanax and Limenitis archippus flying both up and down stream. In 2016 the numbers were reduced in August. I collected very few in Bait Traps and saw even less in the wing. However, by late September they became exceedingly abundant. However, I took very few in Bait Traps. Even Persimmons would not bring them in. Asterocampa's and Polygonia's came in by the hundreds.

The last week in September Limenitis were completely gone. The only exception was Nymphalis antiopa, and they were gone by mid October.

Additional photographs on Page # 12

Scott County, Great Crossing at North Elkhorn Creek, 8 September 2017

The Society of Kentucky Lepidopterists Newsletter is published four times annually. Membership dues are as follows:

- Regular Membership (Paper copy of Newsletter)\$15.00 per year
- Regular Membership (Email copy of Newsletter only)\$15.00 per year

- Sustaining Membership (Paper copy of Newsletter)\$25.00 per year
- Sustaining Membership (Email copy of Newsletter only)\$25.00 per year

The organization is open to anyone with an interest in the Lepidoptera of the State of Kentucky. Information about the Society may be obtained from and dues sent to: Les Ferge, Treasurer, 7119 Hubbard Ave., Middleton, WI 53562-3231
